Offshore Applications

miniBOOSTER is commonly used in casing tongs and ROV tools where the compact size, and the reliability are essential.

An increasing number of sub-systems are requiring high pressure 350–800 bar. miniBOOSTER offers a well proven solution which can be installed directly where high pressure is needed.

Well-proven applications:

- Wellhead Control Panels
- Casing Tongs
- Rough Necks
- ROV tools (Cutting, crimping, bolt tensioners)
- Blowout preventors
- Downhole Safety valves
