## miniBOOSTER Company Profile

miniBOOSTER Hydraulics A/S is a Danish company based in Sønderborg situated in the south of Jutland.

miniBOOSTER was founded on the 1st of January 1994. The first six and a half years we were known as Iversen Hydraulics ApS. In 2000 we changed to our present name miniBOOSTER Hydraulics A/S.

During this period miniBOOSTER has developed a comprehensive application and [product programme](#). Consequently we have successfully grown to be the world largest manufacturer of [oscillating boosters](#), selling our products all over the globe, via a world wide distribution network.

We are now able to solve most applications requiring pressure intensification. The product programme includes solutions for pressures up to 5,000 bar, flows up to 70 l/min and almost every fluid media. This demonstrates our commitment to ongoing and dynamic product development at miniBOOSTER Hydraulics.

miniBOOSTER is [ISO 9001 certified](#), and proud to be approved vendor to several critical Applications:

- Off Shore
- Critical Sub Sea Applications
- Leading Automotive Plants

Best regards

Christen Espersen
