

# miniBOOSTER in BOP Applications, Boost Work pressure

Improve BOP reliability with an HC6DW from miniBOOSTER, by raising the working pressure.

Ensure cost-effective and safe operation by boosting accumulator pressure.

The HC6DW high-pressure booster from miniBOOSTER Hydraulics

- handles very high pressures in deep-water installations
- works with BOP control fluid
- ensures fast and reliable recharge of accumulators
- requires a 2/2 valve in supply line to eliminate leakage
